

Corner Posts (Outside Corners)

INSTALLATION INSTRUCTIONS

Applies to 4" or 6" OUTSIDE CORNER POST

1. Unbox Outside Corner Post from box – measure and cut to desired
2. Install supplied stainless steel brackets into substrate with screws
3. Lift Outside Corner Post into position on top of brackets (may require 2 people)
4. From top to bottom, nail both sides of nailing flange every other hole with 1-1/2" roofing nails
5. After Outside Corner Post is installed, apply weatherization tape (½ on the flange and ½ on the building wrap) for a water tight application
